

ExitVue Information Sheet

28 March 2019

The purpose of this information sheet is to provide important information about the Clear Focus One Way Vision ExitVue product.

ExitVue is a special printable perforated window vinyl film, which complies with the law when installing graphics onto certain bus emergency exit windows.

Background

The National Heavy Vehicle Regulator (NHVR) is requiring all Australian state and territory road and transport departments, when inspecting

buses, including coaches and mini-buses, that they ensure the perforated vinyl film installed on certain emergency exit windows comply with the relevant legislation and regulations governing this area. In this instance, it is the Australian Design Rules (ADR) 44 and 58.

Essentially, the road/transport inspectors will be requiring from the bus company (that is, the bus owner or operator) submit evidence the perforated film has been tested by an appropriately qualified independent certifier.

Specify ExitVue

Therefore, when a printer, sign maker or installer is required to print and/or install a Clear Focus One Way Vision film onto a bus emergency exit window, they **must use ExitVue** (not laminated), because this is our only certified film for bus emergency exit windows. Any other film from our range or if ExitVue is laminated, will mean the inspector may reject the bus for non-compliance.

We suggest you specify Clear Focus One Way Vision ExitVue for the sign/printing company to use on your next bus printing project. We recommend applying ExitVue on all bus windows, to ensure the advertising is consistent across all windows.

ExitVue is available Australia wide from our authorised distributors. Your printer may contact us to learn who is their closest authorised Clear Focus One Way Vision distributor.

It is vital that your printer/installer follows our ExitVue procedures, to ensure the bus is accepted for compliance. These procedures are outlined in our ExitVue Procedures Fact Sheet.
